RAIL RIDER MP (8, 12 & 20)

THE FAST TRACK TO UNLIMITED ACCESS

OVERVIEW

From embankments to under bridges, take your excavator to hard-to-reach locations with the DYMAX Rail Rider MP.

Use your existing excavator without limiting yourself to a rail-only gear installation and retain your equipment's original value. Unlike any other equipment in the market, the Rail Rider MP eliminates the need for undercarriage alterations while allowing you to pull tool carts with attachments or materials to and from remote work sites.

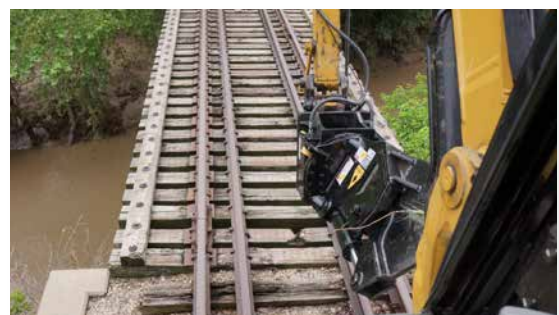

Transform your excavator in minutes!

- Power your Rail Rider MP through the current hydraulics on your excavator.
- Utilize the existing track drive system controls to achieve directional control on the rail.
- Operate hydraulic braking and rail stabilizer clamps through the existing track drive system controls.
- Speeds up to 14 -15 mph.
- Available for 8 - 20 ton excavators in multiple brands.
