

BALLAST BLASTER

BALLAST UNDERCUTTER

Dymax blaster chain features the all new blaster tooth. You don't lose your bits when cutting in reverse.

The revolutionary patent pending blaster bar provides easy replacement of wear parts in the field without removing the chain

DYMAX BALLAST BLASTER - THE COST UNDERCUTTER

The **Dymax Ballast Blaster** was developed to provide a much needed solution to the rail industry's approach to excavator undercutting. Prior to now setting up a machine has required high priced hydraulic configurations, larger machines that carry higher price tags and extremely high maintenance costs. In the end it has emptied your pockets and left you wondering if there was anywhere to turn. Have no fear,

THE DYMAX BALLAST BLASTER IS HERE!

PATENT PENDING BLASTER BAR INNOVATION FROM DYMAXRAIL

The **Dymax Blaster Bar** was developed to provide long service life without needing to throw away your bar. The top and bottom bolt-on chain rail segments fasten to the bar assembly. They are index-able wear pieces that substantially increase wear life and put money back in your pockets.

MOST POWERFUL DRIVE SYSTEM

The **Dymax Ballast Blaster** features a hassle-free heavy-duty direct drive motor system. Its low speed, high torque output provides the highest cutting power. Benefits range from flow rates to substantially lower heat buildup and you don't have to mess with gear boxes!

Yes, that's right! A direct drive system! Another first!
FROM DYMAXRAIL.

SEVERE DUTY BLASTER PARTS

Ballast Blaster wear parts out-blasts the competition. When combined the severe service index-able carbide blaster segments, super hardened sprockets, bearings, cylinders and the Dymax Blaster cutting chain provide longer life, less down time and increase your profit an estimated 40%. Save Big!

MODELS AVAILABLE

The Dymax Ballast Blaster is available in off-track or on/off track interfaces. Dymax matches bar lengths (6-12') to machine sizes for maximizing productivity and efficiency.

We've been manufacturing heavy duty long lasting tools that work since 1930!

BLASTER CHAINS, TEETH & SPROCKETS

Custom engineered for longer life, easier maintenance and superior cutting performance.

Blaster sprockets (left) outweigh the competition by nearly 20lbs

SAVE BIG WITH BLASTER BUCKS

The Dymax Blaster Bucks rebate program puts money back in your pockets. Ask your dealer for details.
